

Why the University of Luton

- Top quality teaching university with 75 years of history – 14th overall in the country, which was commended by the UK Secretary of State for Education
- Among the best for graduate employment - Courses designed with employers to enhance students career prospects
- 3rd best university in the UK for working with business
- Dedicated services of central academic advice, English language support, accommodation, international student support, career advice, chaplaincy and many more
- Excellent facilities – dedicated Learning Resources Centre with modern computers and well-stocked library, and £5.5 million media production studio

Why Luton

- Full-time and part-time jobs for students earning £5-8 per hour in Luton and around
- Main campus next to shopping mall and leisure centre
- 50 km north of London with convenient transportation to London with a day return fare from £6 for students
- Easy access to all London airports
- Low cost flights to many European cities from Luton's own international airport

Why Computing and Information Systems

- Core department offering vocationally relevant programmes – e.g. Computer Science, Computer Networking, Business Information Systems, Mobile Computing, Computer Games Development, Software Engineering, AI and Robotics
- Excellent teaching facilities – over 300 state of the art workstations upgraded every three years, 5 servers and dedicated network, Linux and robotics labs; overall ratio of students per computer nearly twice that recommended by the British Computing Society
- Active in research with a wide range of organisations in the UK and worldwide, especially in applicable areas such as medical visualisation, authentication / security, mobile network optimisation, video mobile, network planning, drug testing, Grid computing and distributed technologies through funded projects from EPSRC, EU and other sources
- Active commercial work with regional, national and international industry and the government
- Real perspective of career for graduates whether they decide to take employment or study for a further degree – opportunities to take MSc studies and studentships for research degrees funded by the University, Research Councils and industry.
